

REMARKS

Reconsideration of this patent application is respectfully requested in view of the foregoing amendments and the following remarks.

On November 21, 2005, an Amendment in Response to Final Office Action was filed.

In the Advisory Action dated December 30, 2005, on page 2 thereof, there were objections to the Specification and to the claims as follows:

The disclosure was objected to because of the following informalities and appropriate correction was required.

(1) The first page of the Specification does not contain a page number, and the number 1 should be contained on the first page.

(2) The dates, the PCT number and the other information on top of line 1 of the page 1 are not necessary and should be removed.

(3) Pages 1a and 4 are left half blank.

A Substitute Specification was required including all changes indicated above. Applicant is reminded that no new matter can be entered into the new Specification.

Claims 13-22 were objected to because of the following informalities: the claims include Labels such as (1,1) which should be removed. Appropriate correction was required.

The Information Disclosure Statement filed on May 16, 2005 will not be acknowledged because it contains the wrong application serial number.

The amendments to this patent application are as follows.

In response to the requirement of the Patent Examiner, a Substitute Specification including all of the Section Headings required by U.S. practice, and including all of the previously made amendments is now being provided. Thus, a Clean Copy and a Marked-Up Version of the Substitute Specification are provided.

In response to the Patent Examiner's objections to the claims, claims 13-22 have been amended to cancel all of the reference numerals.

No new matter has been introduced by this Amendment.

For all these reasons, the Specification, and all the claims, are believed to be in complete compliance with all the requirements of 35 U.S.C. 112. Withdrawal of this ground of rejection is respectfully requested.

On Page 2 of the Advisory Action, there was an objection to an Information Disclosure Statement filed May 16, 2005. In response to this objection, it is respectfully pointed out that no Information Disclosure Statement was filed on May 16, 2005.

In summary, claims 13 to 22 have been amended and claims 13 to 22 are pending. In view of these amendments, it is firmly believed that the present invention, and all the claims, are now in complete

compliance with all the requisites for the granting of a patent,
especially since allowable subject matter has been indicated. A
prompt notification of allowability is respectfully requested.

Respectfully submitted,
HARALD BÖHRINGER ET AL. 1 PCT
